MD. ABDULLAH AL-NOMAN

Mobile: 01718697511
House-201/1, Madrasah Road, Ahmednagar,
Mirpur-1, Dhaka.
Email: **nomanfcb@gmail.com.**
Port-Folio: Abdullah Al-Noman.
GitHub Profile: Abdullah Al-Noman.

Career Objective:

To obtain a challenging software engineering position in a dynamic organization where I can leverage my technical expertise and professional experience to develop innovative software solutions that meet business needs and exceed customer expectations. With a focus on continuous learning and development, I aim to become an experienced software engineer who can deliver high-quality code and lead software development projects.

Education:

YEAR 2022
M.Sc. IN COMPUTER SCIENCE,
CGPA: 3.63 (OUT OF 4)
Jahangirnagar University (JU).

YEAR 2020
B.Sc. IN COMPUTER SCIENCE AND ENGINEERING,
CGPA: 3.73 (OUT OF 4)
Bangladesh Army University of Science and Technology (BAUST).

YEAR 2014
HSC FROM SCIENCE GROUP,
CGPA: 4.60 (OUT OF 5)
Dinajpur Govt. College, Dinajpur.

YEAR 2012
SSC FROM SCIENCE GROUP,
CGPA: 5 (OUT OF 5)
Dinajpur Zilla School, Dinajpur.

Experience:

❖ **Worked at Brotherhood Infotech.**
   Job-Period: March 2022 – February 2023.
   Position: Frontend Developer.

❖ **Internship in Brotherhood Infotech.**
   Internship-Period: 5 Months. (October 2021- February 2022).
   Position: Intern.
   Impact: During my internship, I gained experience in HTML, CSS, and JavaScript, and learned how to create responsive web designs, customize control panels, and create custom designs for web projects. I now have the skills to create functional websites that meet client needs.

Technical Skill:

- **Programming Language**: java, JavaScript, C, C++.
- **For Web:** HTML 5, CSS 3, Bootstrap, Material UI, Tailwind, Chart Js.
- **Frameworks & Libraries:** Next Js, React Js, Node Js, Express Js.

- GIT, Git-Lab, Bit-Bucket.
- **cPanel** Webhost Manager.
- **Database:** MySQL, MongoDB.

Projects:

TRIMATRIK-30BCS MEMBER MANAGEMENT SYSTEM:
- A management system for Trimatrik-30 BCS members.
- Preview: Project Snapshots
- Used technologies:
  - **Frontend**: Next JS, Functional Components, React Hooks, axios, Material UI, Chart Js.
  - **Backend:** Node Js, MySQL, REST API, JWT.

HANGERSTOCK PROJECT (MARCH 2022 – RUNNING):
- A Website made with React and Node JS for auctioning overstock garments products and mobile   phones.
- Preview: Live Preview
- Used technologies:
  - **Frontend:** React and Next JS, Functional Components, React Hooks, Redux, axios, Material UI, React-Bootstrap, Emotion Styled
  - **Backend:** Node Js, MySQL, REST API, JWT.

HANGERSTOCK SELLER PANEL (MARCH 2022 – RUNNING):
- Seller Management System for Hanger stock website.
- Preview: Project Snapshots.
- Used technologies:
  - **Frontend**: Next JS, Functional Components, React Hooks, axios, Material UI.
  - **Backend:** Node Js, MySQL, REST API, JWT.

SHOMAJKOLLAN ORGANIZATIONS MANAGEMENT APP:
- A web application for managing different organizations.
- Preview: Project Snapshots
- Used technologies:
  - **Frontend:** React and Next JS, Functional Components, React Hooks, Redux, axios, Material UI, React-Bootstrap, Emotion Styled
  - **Backend:** Node Js, MySQL, REST API, JWT.

Individual Problem-Solving Platforms:
